

# **VfU Forum Biodiversity**

Irina Detlefsen, 04. April 2011

### **Biodiversity Declarations, Policies and Guidelines**

Core questions to be asked:

- Is there a business case for the financial sector?

  If yes, what is it's relevance compared to other topics?
- Is there a necessity to have biodiversity principles, guidelines and policies to handle biodiversity issues?

#### **VfU-Forum Biodiversity**

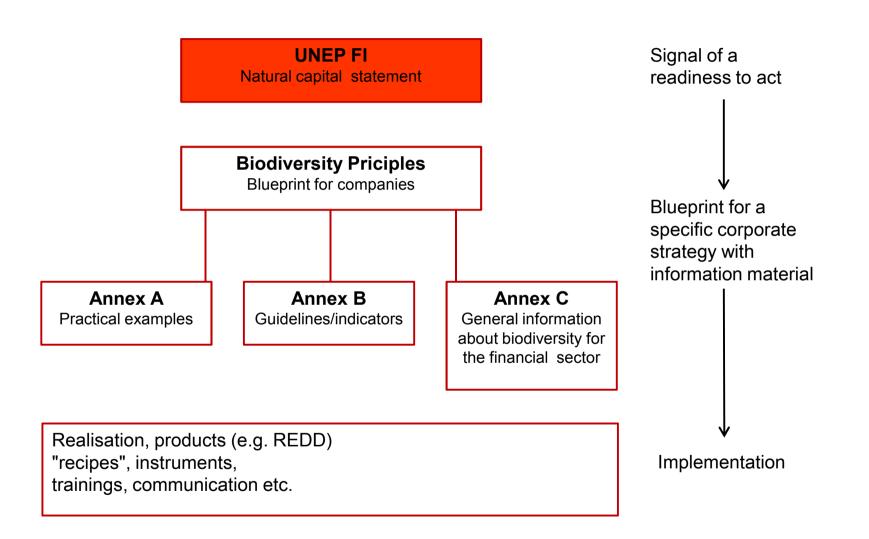

#### **Setting**

- 2009 VfU Round Table: Biodiversity has been identified as an important topic
- 2010 Working group "VfU-Forum Biodiversity": dealing with BES issues from a practical point of view:
  - Link and cooperation with BES initiative of Leuphana University Lüneburg, Global Nature Fund and the German Ministry of the Environment
  - Draft version of the Biodiversity Principles: presented in Nagoya (COP)
  - VfU Round Table 2010: presenting current results, discussing next steps

#### **Status Quo**

- Financial institutions are not ready to sign the Biodiversity Principles within the next years. They rather see them as guidelines.
- There is a need for more detailed information:
  - Business case examples (from a financial institution's perspective)
  - Background information, relevance
  - Indicators, description of the possible impact on:
    - Governance, strategy, management system, building and production site, supply chain, products, production process, logistics, human resources, communication.

### **Integration of Biodiversity Principles**

### **Biodiversity Principles for the Finance Sector**

The recommendations are based on the objectives of the Convention on Biological Diversity:

- The conservation of biological diversity
- Sustainable use of its components
- Fair and equitable sharing of the benefits arising out of the utilization of genetic resources

Definition of "Biodiversity" from a financial sector's perspective

### **Biodiversity Principles for the Finance Sector**

#### Anchoring in the corporate management system

- Strategy, policy and guidelines (incl. measurable targets)
- Clear commitment and responsibility in the senior management
- Regular reporting
- Avoid products and services which have a negative impact on BES
- Involve employees, capacity building (awareness raising, information, training)

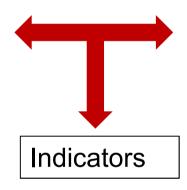

#### **Anchoring in the business segments**

- Research activities
- Asset management
- Retail banking
- Insurance and reinsurance
- Corporate banking
- Investment banking & global markets
- Project finance

#### **Annex B: Guidelines / Indicators**

## **Business segments**

- Governance, strategy
- Management system, compliance
- Building and production site
- Supply chain
- Products
- Production processes
- Transport and logistics
- Human ressources
- Communication and reporting

#### Impact factors

- Loss of habitat
- Climate change
- Overexploiting
- Emissions
- Neobiota and GMOs
